MESSAGE FROM THE COUNTRY DIRECTOR

The era of 21st century is characterized by everyday emerging new and innovative ways of learning. Government is making lots of attempts to bring about an inclusive education system at elementary education level, secondary level and higher education level. These programmes include community mobilization, extensive training of teachers including gender sensitization, development of model schools in clusters. This change has been clubbed with new tools of technology that has influenced on the present education system, its way of thinking, spreading awareness, to access information and knowledge. There is a need for special attention to serve the marginalized and underserved communities who are living at periphery of resources and are not aware of the technological boom and how they can be benefitted from it. Though the government policies are directed towards "Education for All" but to reach the unreached, to serve the underserved and to maintain the quality of education, there is a need to strengthen "Public-Private-Partnership" (PPP) model.

READ, with Bottom-up Approach, has set up one of the unique models to empower communities through its Community Library and Resource Centers (CLRCs), specially the women and children who are the regular visitors at READ Centers. The integral approach of bringing Education, Enterprise followed by intensive trainings at the Centers is bringing a social change in the rural communities wherever READ has its Centers and communities are owning the programmes.

READ CLRCs are playing a critical role in helping disadvantaged and marginalized communities by providing new opportunities to become better educated and economically & socially empowered. Each community is unique and hence each Center is distinctive in its response to serving the interests, needs of the local communities. The outreach activities are not imposed but demanded; communities are made to realize ‘where they are’ and ‘where to go’ by creating new opportunities for themselves.

This is an opportunity to thank all that have been associated with READ India including the communities who have been working with us to translate our objectives into reality.

Geeta Malhotra, Country Director, READ India
Despite India’s economic growth in 2012, the majority of people still live on less than $2 a day, most of them in rural areas. Millions of villagers don’t participate in the formal economy — especially women, 46.3% of whom are illiterate. Since 2007, READ has been providing access to education and skills training to rural communities in India, making them vibrant places for families to live and thrive.

In 2012, we launched innovative partnerships and piloted new programs in India. We opened a Model Center for a disadvantaged community in New Delhi, and expanded our geographic presence by beginning work in two new states (Haryana and Karnataka). A grant from Caterpillar enabled our expansion to southern India. Through our collaboration with Bharti-Walmart, we began providing literacy and livelihood training to 2,000 women in rural Rajasthan. We also utilized the technology available in our Centers to launch a distance-learning program enabling students to pursue university-level degrees without leaving their villages. We plan to bring this program to all Centers in India in the next three years, while opening 10-15 new Centers.

PROGRAM HIGHLIGHTS:
- 1,816 people received livelihood skills training in sewing, organic farming, weaving, and other handicrafts.
- 275 villagers received health training.
- 215 women learned to read through literacy trainings (see photo left).
- 209 people participated in trainings on computer literacy and radio programming.

SHAHBAD MOHAMMADPUR MODEL CENTER
New Delhi

Opened: September 2012
Reach: 15,000 villagers
Sustaining Enterprise: Vocational training center

Located in a low-income area of New Delhi, the Shahbad Mohammadpur Model Center serves as a testing ground for new programs and partnerships, which can then be replicated at more remote Centers. In 2012, the Center piloted trainings on radio programming, computer literacy, sewing, and English as a foreign language.

CHHAINSA CENTER
Haryana

Construction began: 2012  Opened: March 2013
Reach: 8,400 villagers
Sustaining Enterprise: Dairy cooperative

The Chhainsa Center serves a marginalized Muslim community, where more than half of women are illiterate and many parents struggle to support their families. In addition to trainings, a dairy cooperative was launched as a sustaining enterprise with 16 women selling milk and donating a portion of the profits back to the Center. READ and the community will launch additional enterprises in coming years.
South Asia is home to the greatest number of rural poor in the world, and most rely on subsistence farming. Few livelihood opportunities exist for these villagers to lift themselves out of poverty. At READ, we know that if parents aren’t earning enough to feed their children and provide a safe home, it is difficult for them to prioritize education. READ empowers families financially so that they can choose the right path for their children and their communities.

**MEET JARI**

Meet Jari, of Sangaiprou village, Manipur. She was brought up in a poor family, and they could not afford her education beyond class 12th. She was married at a young age. Jari and her husband struggled to manage their expenses and plan for a good education for their son with their wages doing farm work and other occasional jobs. Then, Jari came to know about a handlooms training and production program at her local READ Center, and she enrolled herself. Through the program, she is able to weave fabric for sale in local markets, and earn an income to support her family. Jari says “I am happy that I have the source which could support little for my son’s schooling and family maintenance”.

**2012 BY THE NUMBERS:**

1,830 villagers participated in sewing, weaving or handicrafts training at READ Centers in 2012. We led a six-month stitching and sewing programme during which 50 women were trained as master trainers. These master trainers will be able to train more women in this group at a later stage.

Through a partnership with Bharti-Walmart and CAF India, READ launched a women’s empowerment initiative to provide education, leadership development and livelihood skills training to more than 2,000 women in coming years. Many of these women earn an income making reusable cloth shopping bags purchased by Bharti-Walmart for use in their stores. The Tazei Center in Manipur started its second sustaining enterprise – a weaving enterprise with 10 looms and 15 beneficiaries. READ provided trainings and is helping to market the products in Delhi. The monthly income will help expand the Center’s educational programming.

INR 15,34,00 was generated through sustaining enterprises at READ Centers in India in 2012. Two new sustaining enterprises were launched to generate income to sustain the operational costs of READ Centers – a vocational training center in Delhi, and a dairy cooperative in Haryana. READ gave seed money to 15 women in the village of Chhainsa to purchase buffaloes as part of this cooperative.
More than half of the population of South Asia is illiterate, and a lack of educational resources in rural areas puts villagers at a disadvantage to their urban counterparts. Minority groups and women face social barriers to education, and illiterate adults rarely get a second chance to learn. Holistic educational programming for people of all ages and backgrounds is a centerpiece of the READ model.

KAILASHI SAINI
When Kailashi was a child, her leg was damaged by polio and she was never able to walk easily. Growing up, her peers made fun of her condition. Discouraged, she dropped out of school and was married at age 18. Her husband’s family was unsupportive of her because she was illiterate and unable to support the family financially. Then, Kailashi heard about a women’s literacy program offered at a nearby READ Center. Determined to become independent, she signed up. For 45 days, she made the journey to the READ Center. After just one month, she was able to read and write. Feeling confident, Kailashi enrolled herself in a sewing program at the Center, and today she plans to start her own tailoring business. Kailashi also learned about her disability rights through the Center, and obtained a certificate that will provide her with a regular subsidy and allowances from the Government of India.
With frequent power outages, poor access to the Internet, and a lack of technological resources, there is a serious risk of rural villagers in South Asia falling even further behind in the digital divide if sustainable access and inclusion aren’t prioritized. This is why READ is doing more each year to use information and communications technology (ICT) as a platform for educational offerings.

**97,814** villagers had free access to the **INTERNET** through READ Centers in 2012. Often READ Centers provide the only free opportunity within hundreds of miles for rural villagers to access the wealth of information available online.

**384** villagers received **COMPUTER TRAINING** – from advanced computer training for adolescent girls and women, to community trainings on Microsoft Office software such as Word and Excel, to Internet usage, typing, and more.

**32** villagers participated in **RADIO** pilot trainings in 2012 – a program we plan to expand in the future. Mobile phones and radio are ideal tools to deliver information to rural villagers who are illiterate. In 2012, three READ Centers in India created radio programs targeting specific segments of the population, and “narrowcast” them to audiences through computers, mobile phones, and loudspeakers. Narrowcasting has been used to generate awareness on information related to day-to-day issues such as health & hygiene, education and the environment.

**MEET THE YOUTH OF BARAN, INDIA**

Many villagers in rural India lack basic knowledge about their rights, health issues, and the environment. Understanding these topics can make the difference between a landless community and one that can survive, or between a child bride and a girl who can stay in school. In 2012, twenty students developed “narrowcast” radio programs on indigenous rights through a program at the READ Center in Baran District. Volunteers then traveled to 60 nearby villages to form groups that listen to the content through mobile phones in speaker mode. The program was so popular that READ India expanded the program to two other Centers — training women and youth to narrowcast programs on health, child marriage, water conservation, and more.

NARROWCASTING has traditionally been understood as the dissemination of information to a narrow / selected audience; not to the broader public at-large. Narrowcasting involves aiming media messages at specific segments of the communities defined by values, preferences, demographic attributes, and/or culture.
In the next 20 years, 130 million girls in South Asia will enter into child marriage, ending their education and resulting in early pregnancies. Less than half of women are literate, and many must seek permission to leave their homes. Investing in women and providing them a safe space is a central focus of READ’s model, because we know that an educated woman is more likely to contribute to her family’s income, invest in their health, and prioritize schooling for her children.

MEET SUMAN LATA
Suman married soon after finishing school and quickly found herself at home without meaningful work or the power to make decisions in her own family. She enrolled in a women’s empowerment program at the READ Model Center in Shahbad, India, and soon gained the confidence to assert herself. “Before, I had to ask my family to make important decisions. Now that I am involved with the READ Center, my family consults me,” she said. Suman founded the Saheili Club, a women’s group at the Center, where she coordinates courses on literacy, women’s health issues, and more for 45 illiterate women. Today, Suman is a role model for her daughter and mother-in-law, who regularly visit the Center, and a leader in her community.

2012 BY THE NUMBERS:

698 villagers received HEALTH TRAINING in and education in 2012. READ organized a series of workshops with Dr. Namita Bhatnagar, a specialist on environmental health. The main objective of these workshops was to sensitize the community — especially children — on the harms in our immediate environment, and how can we prevent them by taking simple yet effective steps.

240 women participated in SELF-HELP GROUPS at READ Centers in 2012. Self-help groups educate community members about how to access government schemes, engage women in income-generating activities, and teach them about savings. The groups also provide trainings on women’s rights and other gender issues.

100 women participated in LEADERSHIP training in 2012. This pilot was conducted at two READ Centers with our NGO partner Springboard, and is a comprehensive program that involves four one-day workshops spread over 3–4 months. The objective is to help women to explore their inner potential and help them to identify their hidden or unexplored qualities to help them become a better empowered human.
Institutional Partners

READ would like to thank all of our institutional partners from around the world for joining us in inspiring rural prosperity. Leading corporations, foundations, international NGOs, and government funders have partnered with READ to further our mission through monetary contributions, program partnerships, in-kind support, and employee engagement. Through these partnerships, we have expanded our scope to bring the READ Effect to thousands of people across India.

CATERPILLAR FOUNDATION is partnering with READ to continue our expansion in India to the states of Karnataka and Maharashtra. Through this three-year partnership, we will establish 3-4 READ Centers and provide communities with educational opportunities and livelihood skills trainings, with a particular focus on children, computer literacy, and women’s empowerment. The partnership will bring much-needed resources and opportunities to an estimated 25,000 people.

BHARTI WALMART & CAF INDIA are partnering with READ in rural Rajasthan, India on a women’s empowerment initiative to provide education, leadership development, and livelihood skills training. As part of this partnership, READ is providing these trainings to more than 2,000 women, many of whom are also earning income by making reusable cloth shopping bags purchased by Bharti Walmart for use in their stores.

The Bill & Melinda Gates Foundation has been an integral partner for READ since 2006. Since then the Foundation has supported our expansion into Bhutan and India, and has more recently provided capacity-building funding to help us strengthen our program design, information and communications technology offerings, monitoring and evaluation processes, and fundraising capacity.

Swades Foundation and READ are partnering to expand READ’s work into rural Maharashtra. Together, we hope to establish several Centers to provide an array of education and livelihood skills trainings to support the economic empowerment of thousands of rural villagers.

Nalanda Foundation is partnering with READ to set up new Centers in Uttar Pradesh. READ and Nalanda launched a pilot in Rampur district to bring education, enterprise and social development to the area through the READ Center.

Socio Demographic Society (SDS) has partnered with READ to establish a Center in Bharatpur district, Rajasthan. READ and SDS will work with local farmers and women to seed-fund and launch a sustaining enterprise for the Center.

BHARTI WALMART & CAF INDIA are partnering with READ in rural Rajasthan, India on a women’s empowerment initiative to provide education, leadership development, and livelihood skills training. As part of this partnership, READ is providing these trainings to more than 2,000 women, many of whom are also earning income by making reusable cloth shopping bags purchased by Bharti Walmart for use in their stores.

IN-KIND DONORS:
Room to Read
UNESCO
Vodafone

PROGRAM PARTNERS:
Technology for the People is READ’s implementation partner in Karnataka, and provides technical support to develop innovative programs using technology.

TARA Nirman Kendra and Development Alternatives partnered with READ to construct our eco-friendly Center in Geejgarh, Rajasthan and are providing adult literacy programming through their TARA Akshar Programme.

Mahatma Gandhi University is partnering with READ to offer a distance learning higher education program at READ Centers in rural communities through the use of information and communications technology.

OTHER PROGRAM PARTNERS:
America India Foundation
Aradhya
Digital Empowerment Foundation
Dr. Shroff’s Charity Eye Hospital
Springboard
Times India
